First name: Deborah

Last name: Harsh

Organization: None

Title:

Comments: Destroying the Earth's natural watershed is to shorten the lives of all the residents on earth, human included. This plan seeks financial gain, not for the People of the United States, but for a minority of Oligarchs. Instead we need to access - with a real understanding of the interconnections of all life on the planet, how we can restore the quality of biological life. We are facing extinction from activities that degrade the biosphere of our home planet. One of the only places we have found life in the Universe. Gold is not not worth this, nor is a lifestyle based on minerals extracted from what little we have left of the natural environment.

Foolish, greedy, and misguided, paid for by the people of our nation for the benefit of a few.

We need to plan for the future of our children and grandchildren, repair our environment, not degrade it.
