Comments: Crystal River Trail

Dear Ms. Grail,

I am a full-time resident of Crystal River Park, located approximately a mile south of Redstone and frequently walk or cycle from my home to and from the village of Redstone along highway 133. The possibility of a safer alternative trail route is exciting and I fully support the planned alignment along the highway right of way and utilizing historic wagon trails where feasible. I frequently hike along those trail routes, including the switchbacks section up to McClure Pass and believe that the impact to wildlife and vegetation of improving those trails would be negligibly small. The proposed trail alignment would connect the Elk Mountain, Crystal River Park and Ranch Acres residential areas and Hays Creek Falls to the village of Redstone, providing safe transportation and recreational routes to residents and visitors.

Sincerely,

Ronald A. Phaneuf
