Comments: Let the horses run free. Leave them be. Wild horses are part of American heritage. They have been since settlers came here. They are beautiful and are a symbol of freedom. They also ignite the imagination of many (myself included). I also am so tired of hearing about human beings restricting nature and messing with it. Just leave them alone. There are way bigger issues in nature than some horses, like pollution, over foresting, our planet potentially becoming unlivable... The list is long and horses should be at the very bottom of it.
