Title:

Comments: Please reconsider your plan about the horses. It is not in the interests of their future. You are taking away if their range and containing them to an area that will not support them in a healthy environment and well being. You will be destroying the heard and in my opinion that is the what the government agencies are doing little by little. The history of this country is being wiped out by ml onet and greed. Please reconsider your plans to take the horses into consideration before the money trail.
