Comments: The wild horses are part of what has called me back to vacation again and again. They are an integral part of this natural environment. They belong! Their ancestors were on these lands long before the white man landed in America and "discovered" what had existed in harmony for years before his interference! The horses brought back to America and gone feral have just returned a natural order. KEEP YOUR HANDS OFF the wild horses BLM. You are simply an enforcement arm of wealthy corporate ranching industries!
