Comments: Wild horses are peaceful and our icons. We do not need more beef cattle and kill for profit.

I wish the US Forest Service is seriously reconsidering to plan on removing these majestic Heber Wild Horses.

Arizona is leasing public land to Ranchers from out of state who bring their cattle to graze so in the end wild horses will be rounded up and most likely sent to holding pens, sold for pennies to be slaughtered.

Thank you for taking a minute or two to hear Our voices are needed.

Nature, wildlife and conservation first, profit last.
