Comments: Please let the horses stay in their home! Why is it that these animals that are part of the whole eco system have to be "removed" to benefit the ranchers??? Why can't their cattle graze on their own property? For them to demand that these wild horses be "removed" is disgraceful. They chose to be ranchers, just as other people chose their professions, so why is it that they get to take over large public areas and make it theirs? The horses live in harmony with the nature, as it should be, and ranchers have no business encroaching on their home. Removing these horses from their home would be disgraceful!
