Comments: RE: Wild and Scenic Rivers Eligibility Supplement

The key finding that no river or any streams flowing into or through the WNF qualify for Wild or Scenic status leaves only a few statements to be made.

The last paragraph on page 10 needs to be in bold face and placed very early in the draft so that readers do not become either angry or discouraged.

Reinforcing this sentiment, an appeal to the community to continue to keep the WNF informed of changes and opportunities on streams could be made stronger.

Page 192 2 (Camp Creek Symmes Creek sub watershed) There could be a (weak) case made for this area being of significance because of the unusual proximity of different community types in a very short distance, thus providing a site for studies.
