Comments: I understand that the wild horse population needs to be controlled for the benefit of all, but the proposed plan is too drastic and restrictive. This plan would result in the eventual end of the wild horses in the Heber-Overgaard area, which is not acceptable. I believe that they need to come up with a plan that will preserve a larger portion of the herd, and give the horses a more reasonable size area to live. This will help keep them from being wiped out completely.
