Title:

Comments: Heber Wild Horse Territory. In my opinion, the BLM is stripping the land of the living things that have made America what it is today...these are not just horses. This is the problem....they are not seen for what they are. They are seen by the BLM as disposable. A commodity to be used as they see fit....even to their death. The Wild Horses and Burros are part of our culture and our land....read again OUR land. They helped build this country!! Horses died alongside the soldiers in wars...for us, for our freedom...and now you cage them and deprive them of their freedom!! I do not want them rounded up, killed, traumatized, sterilized or altered in any way. The public knows this is for money, for the constituents of the BLM...the cattlemen's association. Stop this abuse. The American public does not want to have the horses removed, anymore than they want horse slaughter. The media does not cover these topics, so you have that going for you....the public is not aware. Once they are aware, they will not stand for this.
