Comments: Please, PLEASE, consider another way to controll wild horse populations besides the ranchers answer to everything. I have livestock. I own the land they live on and I pay for the feed they eat. Ranchers don't own the public lands or the grass that grows there. Tell them to take their cows home, to their own ranches with their own stores of cattle feed. That's only fair!

We love having wild horses...wild! Please don't take them off their land. They should have some rights, seeing that they're protected!

Leave them alone.

Thank you.
