Title:

Comments: I have owned horses all my life and the beauty and history of our heritage must not be lost. Many of these horses were brought over from Spain. Our children and their children need to be able to see the beauty and history of these beautiful horses, once they are gone we will never see their beauty and be able to teach our children of their past, just to tell them that they were brutally destroyed. They are part of our Heritage, they must be preserved for all to enjoy.
