Comments: I oppose ANY removal of healthy wild horses from the range. Just because you CAN remove any wild animal from their habitat does not mean you should. There is no scientific reason to remove wild horses from their homes, and EVERY reason to limit the number of domestic species encroaching upon them. By doing so you are irreparably harming the environment and ultimately the long term health of our planet. You will be judged. I hope none of you call yourselves Christians as you are NOT good stewards of the gift God has given us.
