Comments: Do not use this Plan. Do not disturb the Heber Wild Horses
Hi, I am sorry i do not want to insult anyone but it surprises me that our professionals are so ignorant of what is an American Wild Horse.
Our Wild Horses are America's living chronological history. They are the only mammal that represents our migration and progress in America as well as the evolutionary history of America for millions of years. The horses ruled this land and now we only have a few token herds left. Heber is one of the last of these herds that have not been altered by continual roundups or birth control.
Please do not destroy one of our last opportunities to witness their ancient character. No to AML, no to roundups or birth control, yes to limiting "other interests", yes to making stewards out of permittees and sign agreements with them, yes to embracing this rare and unique treasure we the people love.
