Comments: All wild horses have roamed somewhere in Arizona land for many years why no is it such a bother to resident's in this area and why are they being killed off by some resident's. This is government land they should be safe there. If a private citizen was to burn down the forest that is a crime. So why is it the Government is not doing more to protect the horses just like any other wild life that lives there. If they cant live there peacefully then they should be taken somewhere else in Arizona to live freely without danger of being harmed. This is just not right.
