First name: Claudia

Last name: Bloom

Organization:

Title:

Comments: I am 30 yr. Az. resident and a frequent hiker, and I have never wanted cows on my public lands. Ever.

Please show us how

1. Wild horses "damage" public lands-and don't show us pictures of all the waterways where the banks are decimated with cow erosion and dung and then blame it on the horses
2. Horse "overpopulation" - really? Oh wait, dig up that one picture of a skinny horse in Nevada used by all the agencies to prove horse overpopulation.
3. Also please show us how we benefit from having cow herds from out of state - corporations use up the forest in a dry state. Love to see that story.
