First name: Claudia

Last name: Bloom

Organization:

Title:

Comments: I am 30 yr. Az. resident and a frequent hiker, and I have never wanted cows on my public lands. Ever.

Please show us how

1. Wild horses "damage" public lands-and don't show us pictures of all the waterways where the banks are decimated with cow erosion and dung and then blame it on the horses
2. Horse "overpopulation" - really? Oh wait, dig up that one picture of a skinny horse in Nevada used by all the agencies to prove horse overpopulation.
3. Also please show us how we benefit from having cow herds from out of state corporations use up the forest in a dry state. Love to see that story.
