Title:

Comments: I am 30 yr. Az. resident and a frequent hiker, and I have never wanted cows on my public lands.

Ever.

Please show us how

- 1. Wild horses "damage" public lands-and don't show us pictures of all the waterways where the banks are decimated with cow erosion and dung and then blame it on the horses
- 2. Horse "overpopulation" really? Oh wait, dig up that one picture of a skinny horse in nevada used by all the agencies to prove horse overpopulation.
- 3.Also please show us how we benefit from having cow herds from out of state corporations use up the forest in a dry state. Love to see that story.
