Comments: Leave the horses where they are and stop trying to give more room to cattle ranchers wanting more land and water ..humans who want to play on their toys and people wanting to develop land for money. These horses are a treasure. They are beautiful and deserve every protection. Millions of humans have loved here to Arizona and every other state where horses live. Humans have populated and ravished land, animals, water resources. Just leave the horses alone. I want to see more free range land for them. I want to see fewer fences and more control on human behavior that endangers them and every other wild being that lives here. Humans and their entitlement have no end to the "need" for more room...more things...more money.
