Comments: This is what I expect to your answer to your solution regarding Heber horses following the horse shootings and cattle grazing in the Forest. Instead of hunting down the individual or individuals responsible for killing many horses holding them responsible for their actions you now want to remove the horses.

Now this announcement of removing the horses gives me the impression that you at the Forest Service know exactly who are and have been shooting the horses giving Livestock ranchers just what they wanted no more horses competing for grazing. This is pathetic answer for a solution to solve your problem.

The Forest Service knows exactly who has been shooting horses. You have done nothing ignoring the public, ignoring crimes against animals, no trail cams were never put in place, no insight observer to try to catch the responsible individual or individuals who have shot horses.

Since this is your solution you have been playing hand and hand with livestock ranchers because you can't ignore the revenue for money grained on grazing fees.

The Forestry Service and the BLM are all the same no good.
