Comments: I am in complete disagreement with the proposed restrictions and reductions presented regarding the herd free roaming space and the size of the herd. These are sacred animals. They have a long standing history with this country and should be revered. This proposal not only is harmful to the herd but it ecologically will harm the area. These animals are a vital part of the ecosystem. Please do not impose this proposal. These horses are part of our heritage and this land was theirs first. Give them free reign and maintain the natural size of the herd.
