Comments: This must stop. Horses belong on the land and help the environment in so many ways...The science is there. Horrid that special interests have the upper hand and the BLM is in their pockets. Leave these beasts to roam and live in their family bonds..Running them down and killing them is no solution. Cruelty and abuse id what it is ! There is no overpopulation problem...Greed and profit motivates you all. Horrid. There are laws to protect them. Honor those laws
