Comments: We are responding in support of Deschutes National Forest proposed prohibition of camping and campfires as outlined in "Table 1-Proposed camping and campfire prohibitions" and specifically the "Cascade Lakes Highway Scenic Views Corridor".

We have personally witnessed the heavy camping traffic and fires within the scenic corridor and confirm that the aesthetic appearance has been degraded as a result. We also have noticed that there are no services available for campers in this area that has resulted in unsightly garbage along the new bike path and forest roads.

We look forward to the implementation of the proposed streamlined Camping and Campfires Forest Orders. Please contact us directly if you have any questions or comments.
