First name: DEBRA

Last name: ADIMEY

Organization:

Title:

Comments: These historic animals have been roaming the earth long before humans, 50 million years. They along with other creatures that live in the wild BELONG in the wild. This is their land not ours. These animals should be in protective status with the government due to the amount of round ups that are being conducted all over the US. They are being sold to slaughter houses. Without protection and being left alone in their natural atmosphere, they will become extinct and no one wants this to happen. Leave them alone. They have been through many fires, droughts, storms, floods, snow and they are still alive. They will live so that our Grandchildren's children and beyond can see these beautiful harmless magnificent creatures. You will also effect the eco system as horse are food for large animals in the wild. Keep Horses wild and free.
