Comments: To Whom it may concern,

our state's treasures, these Mustangs, are being attacked literally on all fronts. We must take action to save them! they are NOT domestic-they are wild.

Their natural migration routes in the Heber area as well as the Salt River are being closed. They need these routes to survive. We have groups in this state that are experts on these Mustangs-you must take their council on how to best provide for these incredible treasures to our state. PLEASE don't let these historic treasures die!!

sincerley,

Kimijo Mareska
