Comments: Although I look forward to a paved road biking route from Carbondale to McClure Pass, I am not excited about a soft surface mountain biking trail from Redstone to the pass. All that will do is clog up H 133 and Redstone parking with mountain bikers! May be good for the riders, Redstone breweries and such, but not exactly enhancing a mountain experience for other users.

I would very much like to experience paved road widening in the next couple of years so I can enjoy the ride before I die or am too old to participate.
