Comments: My wife and I strongly believe that the camping off Century Dr and proposed new rules that would allow the Forest Service to ban overnight camping and campfires within a significant distance of the National Scenic Highway (Century Drive) between Tetherow and the new Welcome Station just west of the Inn at Seventh Mountain is long overdue!

The number of fire risks we have seen, the lack of sanitation facilities should simply not be across the street from our large Widgi development. I am sure that the fire service doesn't not wish to have on their watch any possible liability that can be caused by maintaining the current status quo. We expect that this "scoping" period will not get bogged down and we can expect significant rule changes to occur beginning THIS SUMMER SEASON!
