Comments: I do feel compassion for the folks who are camping in the forest close to my house because they are probably homeless and affordable housing is such an issue here.

My concern is fire, always fire! I'm just not sure how responsible everyone is about campfires. We've lived here 28 years and have seen a number of campfires left unattended. Luckily they were put out early by authorities, so no huge damage was done.

The other concern is garbage left by folks who just don't seem to care about the forest.

So those two are my issues with camping on China Hat Road near to two subdivisions. Thank you for letting me comment.
