Comments: Hello

Writing for the dear wild horses that are so beautiful and belong. More to the point there is no shortage of beef but there is a shortage of wild animals that benefit their environments. 50% of the Earths wild animals are gone due to humans yet our politicians continue to cause a mass extinction against good science! If you think everything boils down to a dollar I feel sorry for you. You have missed the finer things in life. We need wild animals far more than they need us. You are representing the People not billionaire "Ranchers". We urge you to act with integrity or be voted out.
