Comments: Please figure out a way to save the Heber Wild Horses from further reductions of their numbers by cruel roundups and removals from their Territory. Please consider what these iconic/native mustangs and wild horses have already been through, including so many killings and destruction of their family units and their herd members. These wild horses need to be given priority on our public lands over cattle/livestock as per the 1971 law. And I would further implore the USFS/USDA and BLM that they need to be given a larger allotment on our ample public lands. Please look at giving these wild horses a chance to live out their lives in the wild not corralling them for adoption or more sadly ultimate slaughter. The Heber Wild Horses bloodlines deserve to be preserved for perpetuity on our public lands not sent to a slaughterhouse in another country.
