Comments: This Heber Wild Horse Managment Plan sounds good. I would just hope that it is followed and that no horses are hurt because someone did not follow the plan. I have seen photos and read stories about round up and they are not pleasant for the horses. I hope that the guidelines eat for I. This plan are carried out to a T and that none of the horses are hurt needlessly. If you decide on birth control at some point I hope that it is something safe and does not mutilate the horses. I hope that we the people can be informed as this plan takes place and continues through the years.
