Title:
Comments: The Heber wild horses are a national treasure and should be protected and saved, from being exterminated. Roundups and Removals will jeopardize the long term sustainability of the Heber herd. These horses are harming no one on our public lands and are certainly no threat to all the cattle/livestock that significantly dwarf wild horses numbers. Wild horses native habits are naturally good for the environment and help maintain the land and cause it to flourish. People who live in the area know that Heber wild horses herd numbers are being exaggerated by our cattle/livestock corrupted government officials. Removal is totally unnecessary for the wild horses,but more appropriate for cattle in unenforced livestock trespass. Please do all you can to preserve this valuable herd of wild horses
and their bloodlines,instead of jeopardizing these sentient horses by unwarranted cruel removals. In the meantime, Heber wild horses are being shot and killed - it's been going on far too long. The criminal perpetrators of this cowardly slaughter should have been brought to justice by law enforcement in cooperation with our government already. Local area citizens must surely know the culprits involved with these heinous killings and bringing the criminals to justice should be given higher priority and a greater sense of urgency in putting them behind bars! The Heber Wild Horses deserve more respect and so much better treatment!
