Comments: First these are not wild horses. I have been in these woods since 1978 between Show Low and Heber, and their was not been any horses in this area till the Rodeo/chediski fire in 2001. after that fire the fence along the Reservation line was gone due to the fire this is when the horses issues started showing up and, now since we have not done anything about it the horse population has got out of hand and something needs to be done about this. We need to round up these horses and find them new homes before they all die off. It is not the Forest Problem it the Reservation problem. We need to move these horses to save these HORSES.
