Comments: Do NOT remove these iconic horses from Heber, AZ. There are not too many of them, and to reduce the herd that much would reduce the genetic viability. Basically you would be causing them to go extinct. They are a part of our history and deserve to be free! As far as I'm concerned, this is all about the money, whether it be from the sale or the kill of the animals or wanting to open up the lands to oil and gas drilling and mining. That's what it's come to now. WE as Americans are NOT free, so let the horses BE free.
