Comments: In regards to the Heber Wild Horse Territory. My heart has just broken upon reading how many of these horses have been killed, including the Stallion, and no one has been held responsible.

Removing these horses is a very disgusting, cruel and evil thing to me. They should be given a safe place to live and allow people to see and admire them and bring funds into a community.

Please consider do the right thing by these horses, they have suffered enough. Let them live free and wild as it was. meant to be.'

Thank you.
