Comments: There is no environmental nor sciui entic reasoning behind this planned genocide of Amer8ca's Wild Horses. No more round ups and no more hindefinite holding pebs (aka horse prisons) thff at is costing 5ax payers billions of dollars abd at an expence to the forests, and the evronment at large.

It is tge practice of leasing 'grazing' permits to ranchers so their cattle can graze for pennies yet demand tgere is no competition from the indigenous species that have called American rangelands home for 100s of years.

Do your serious homework before presuming you -mere humans- know better how to "manage" our wildlife than Nature does. You don't. You can't.
