Comments: I'm very concerned with some unanswered questions I have.

1. I haven't seen a census done since 2006, please provide a copy. Your statement was "Unmanigable population growths". Please source your claim with a current census.
2. What affect is fencing for cows having on protected wild horses? Im concerned fences are being placed that are stopping our horses from water supplies and/or food supplies.
3. I have seen many comments from authorities about starving horses. Other than occasional sick horse or isolated horses blocked in by fencing for cows, I haven't seen any pictures of starving horses?

We love and respect our wild horses, perhaps our government can respect it's citizens & our laws, do the same. Just uphold the law as it is written.

Thanks in advance for your assistance.
