Comments: I am writing in support of keeping the Heber wild horses just that, wild! I visit this area often with my family and always enjoy spotting them in the distance along our drive. Please do your part to preserve this herds population and genetic diversity. It is wrong that they are being shot and they should not be restricted to such small areas in comparison to what they are used to. Thank you for your consideration and hopefully doing what is not only morally right, but also biologically the right thing to do.
