Comments: This is an outrage. These horses have been here for a millennia and have a right to roam this land.
We are not talking about thousands of horse.
I have adopted horses that were going to go for slaughter. These horses have a "right" to be there.
The way to cut down on the horse with in-breeding is to geld the stallions!!!!!!
There are always other options and one of them is not to "round them up" or euthanize them.
Please consider allowing some of them to be auctioned off.
