Comments: I wish to write in support of the expansion project as proposed by Mission Ridge Resort. I perceive many benefits to our community including economic growth and an expansion of recreational opportunities.

Currently (February of a low snow year) I have to drive an hour to cross country ski even though there is ample snow at the Ridge. However, there are no groomed trails or terrain for nordic skiing. I know that besides myself there are several people interested in buying a pass to nordic ski at the Ridge if a trail system is built who are currently going elsewhere. I am also interested in expanded mountain biking. Furthermore, it would be a proud moment for us to see Wenatchee have a true mountain town feel, which is currently lacking in the state. Finally, there would likely be several new jobs created through construction and employment at the mountain, which would be good for many in our population.
