Comments: I can't understand why money is the only reason for removing these horses. They belong there. There are other places that rich ranchers can rent for their cows. There are very few truly wild horses left in America. They are a part of our western history. Please rethink your stand on doing such an unconscionable act. There is no turning back once it is done. Don't do something out of greed that will only benefit a few and hurt so many. Arizona is a wild wonderful place and deserves to stay that way. Not be turned into a pasture for cows!
