Comments: Growth in the Wenatchee Valley is inevitable. The idea of a large planned development is crucial, otherwise we will continue to develop in individual and slow fashion that will not be nearly as sensitive to the environmental impacts analysis that will occur with a project such as this. Our community needs development in order to bring in a variety of jobs and opportunities. This is a unique opportunity in which our region can highlight its assets, create year round opportunities for recreation and jobs, while at the same time serving as a draw from across the state to a real destination resort.
