Comments: What gives us the right to interfere? What gives you the right to decide that horses whom have been here way longer than us need to be reduced? How about reducing the amount of people you give cattle grazing licenses to. These Wildhorses are imperative in maintaining the culture and history of Arizona. It's what keeps Arizona, Arizona. People come from around the world to see the wild and natural beauty of this state and removing these wildhorses is taking that away. Arizona has always been the Wild West and it's been unique. Don't be like every other state. Don't mess with the horses.
