Title:
Comments: Limiting the size of this herd, or further restricting its range, will be overall harmful to its genetic diversity and likely lead to the eradication of this historic herd. Humans are ever encroaching on the natural habitats of other animals and the trend is concerning. We all need to treat our gifts from G-d will greater respect.

Job 35:11 Who teaches us more than he teaches the beasts of the Earth and makes is wiser than the birds in the sky
.
