Comments: This will be a terrible tragedy if things aren't straightened out! These are wild horses that deserve & are protected by law to run free, also without fences. There should be no type of sterilization which is inhumane & against all that's to be protected. The land shows plenty for the horses which have seen healthy! Stop this cutting down to 50, to unbalance nature! You're so wrong to even think of doing away or regulating the herds. This could also end up cutting down all wild horses. Cut down the cattle to 50 if you think that's a problem. In reality there's room for both! Thank you
