Title:

Comments: Part of the US forest service job is to provide "stewardship" for wildlife. In protection of this amazing natural wildlife you are failing miserably. You are putting the greed of a business before the NEEDS of a natural resource and should be ashamed of your failure to protect these beautiful animals. These horses are in their own environment and should not be adopted out and under NO circumstances should a single one of them be killed. What is wrong with you? DO YOUR JOB AND PROTECT THESE HORSES! As a citizen of Arizona this is what I expect of you.
