Comments: How dare anyone suggest you would destroy these beautiful Horses that have been here long before us. This is their home, their environment & they should have the right to be here first, then if possible the cattle can be allowed. None of us should ever think of destroying these animals. It is no different than if our country would bring in foreign people & let them eat what we grow before feeding ourselves. These HORSES belong here in our forest before any private individuals or companies who would "profit" by destroying them & replacing them with cattle or whatever!! We have treated & hurt our native people's lives, lets not destroy or treat these beautiful animals the same. The plan to adopt these animals out is an amazing way to help the situation but make this process affordable so the larger portion of the population can be adopted. If you want to destroy to get rid of these beautiful horses then be willing to "give them away" before charging fees so people cannot afford them. Hopefully you have comprehended from my comment that I stand for our Public Lands to belong to everyone & all things that do not fight us or take away anymore of our rights.

These beautiful Horses BELONG here, this was God's Wish when he created them & a free domain for them to graze & live in freely & not be shot or treated badly.
