Comments: I call on the National Forest Service to reconsider the plans for drastically reducing the Heber Wild Horse herd to just 50-101 horses. Such low number of individuals are not genetically viable for the health of the herd. Additionally, you are allowing huge numbers of cattle to graze on those public lands that had been designated by Congress as wild horse habitat! Nationwide, both the Forest Service and the BLM are waging wars of eradication on our beloved wild horse herds despite the fact that over 80% of Americans want these iconic animals preserved and managed according to scientific recommendations. (2013) NFS and BLM are bowing to welfare-to-the-rich when allowing ranchers to graze their cattle for pennies on the dollar while destroying our wild horse herds. THIS MUST BE STOPPED AND THIS MUST BE STOPPED NOW.
