First name: Pat

Last name: Wolph

Organization:

Title:

Comments: The BLM or Forest Service needs to give the Heber wild horses and burros their fair share of the land and stop bowing to cattle and other livestock interests. The horses and burros are protected and have the right to live in peace on OUR land. The majority of the public want them left alone, they are OUR horses and burros and it is OUR land. It does not belong to ranchers. People are learning that beef is not the best option for eating and are turning to alternative protein sources.
