Comments: Your plan to reduce the Heber Wild horses lands to 21 square miles is completely unacceptable. The horses are entitled to the land and you need to stop considering the cattle ranchers other profit driven motivations to such an extent. The cattle ranchers and their cattle are destroying federal and State lands at an unsustainable rate. It is totally unacceptable to the majority of the country that see the for profit industry is exploiting and destroying our national treasures including our horses. Horses are federally protected animals and should be the priority in this situation.
